Denise,

Thanks for your consideration and e-mailing me your decision to subcontract those samples. No further information is required.

Thanks again.

Adly Michael

Adly,
hope you are well!
This email is to confirm that the initial confirmatory samples for the PSAa were approved to go to the subcontract lab. Please let me know if you need further information.
Thanks.
Denise Zeno

Buenos días Denise,

The form submitted with this email is for the initial confirmatory samples from the PSAs that were designated to go to the subcontract laboratory in the work plans. I'm told that you need to indicate to Adly that you approve use of the subcontract lab for these samples.

The definitive level soil samples to be collected at the PSAs will go through the CLP and laboratory space will be requested in a separate request.

Thanks – we're getting there – electrical hooked up at the trailer and now we just need to wait in line at PREPA's office today to get the paperwork completed.

Susan

Adly:

Attached is a revised request with our current known field dates. The EPA RPM will verify that the samples are planned to go to the subcontract lab. Do let me know if you have any questions.

Thank you,

Adly,

Attached is the lab request for the upcoming sampling event for VOC analysis at the Cabo Rojo Groundwater Contamination Site located in Cabo Rojo, PR. Sampling is scheduled to occur between March 11 and April 5, 2013. Please note that we are requesting 48 hour for unvalidated data due the Cabo Rojo PSA sampling that is being performed. These samples were approved to go to the subcontract laboratory when EPA approved the CDM Smith work plan. The lab samples are confirmatory samples for field GC comparison and 48 hour turnaround time of SHIPPING (not receipt at lab). The RPM will follow up with an email indicating that the subcontract lab is requested.

Please feel free to contact me with any questions.

Thanks in advance.

Vanessa Macwan
